CUSTOMS NOTICE NO. 3 OF 2018

IMPLEMENTATION OF ONLINE EXPORT PERMITS FOR ALL MINERAL EXPORTS

The Ministry of Mines and Minerals Development (MMMD) in conjunction with the Mineral Value Chain Monitoring Project (MVCMP) will be rolling-out the online application system of Mineral Export Permits that has been on pilot since December 2016. Effective March 1st, 2018, all Export Permits for **Copper, Cobalt** and **Precious Metals** will be required to be applied for online on the Mineral Export Permit Application Module of the Mineral Output Statistical Evaluation System (MOSES) by all the Exporters duly licensed to deal in these Minerals. (This covers the Large and Small Scale Mines and Mineral Trading Permit holders).

As a result of this the Zambia Revenue Authority wishes to advise the changes in the business process on AsycudaWorld for submitting declarations for the export of **ALL** minerals effective March 1st, 2018;

1. The mandatory capturing of the Export Permit numbers in box 44 (License No..) for minerals on the export declaration.
2. Ensuring the Net-weight (Kg) is converted correctly to Tones in box 41 (in cases where it is the supplementary unit)

Kindly note that failure to do the above will result in ASYCUDA flagging errors when registering the mineral export declarations.
